Wetland restoration

EUREKA — Join the Land Trust's former Projects and Stewardship Director Ryan Wells to learn about the 35-acre tidal wetland restoration project at the Northcoast Regional Land Trust's Freshwater Farms Reserve, 5851 Myrtle Ave., on Saturday from 9 to 11 a.m. Wells will talk about educational opportunities, monitoring efforts and preliminary findings. Current Executive Director Michael Cipra will outline plans to expand the project and share the long-term, community-based vision for the property. Wear sturdy shoes, bring water and park parallel to the road near the barn.

Rain will cancel the event.

For more information, call Cipra at 822-2242.
